Question 8

Directions: Read the question below. You have 30 minutes to plan, write, and revise your essay.
Typically, an effective response will contain a minimum of 300 words.

Some people believe that it is better to work on a team with the same coworkers for a long period of time. Others believe it is better to regularly change work teams. Which do you agree with? Why?
Give reasons and examples to support your opinion.

Mở bài: Some people believe that it is better to work on a team with the same coworkers for a long period of time, while others think it is better to regularly change work teams. In my opinion, working with the same team for a long time is more beneficial/ better, and there are several reasons to support this view/ my choice.

Body 1: First, working with the same coworkers for a long time helps teams complete tasks faster and more efficiently. This is because team members are familiar with each other's roles and working styles, so they do not waste time adjusting or explaining basic tasks. As a result, they can focus more on their responsibilities/ tasks, and work is completed more smoothly, which contributes to the overall performance of the company.

Body 2: **Second, long-term teamwork helps reduce conflicts in the workplace.** When people work together for a long period of time, **they understand each other's personalities and responsibilities better.** This helps reduce misunderstandings and unnecessary arguments. Even when disagreements happen, team members can resolve problems more calmly and professionally. As a result, people in the team feel less stressed and more comfortable.

Ky Anh: First, working with the same coworkers for a long time helps teams complete tasks faster and more efficiently. This is because they understand each other's strengths and working styles very well. When people work together for a long time, they can communicate easily without explaining too much. As a result, they finish their jobs much more quickly with the best conditions.
Quy: This is because team members can become more familiar with the others' personality and ability. As a result, they can focus on their tasks and finish them effectively in a short time instead of spending time on explaining the tasks. For instance, when I have a teamwork task in class I always make a team with my two best friends because I clearly understand their strengths and weaknesses. Therefore, we can easily finish our homework and get a high score.

Tram. First, working with the same coworkers for a long time helps teams complete tasks faster and more efficiently. This is because all workers can understand each other's strengths so they do not need to spend more time learning and talking to each other. As a result, they can focus more on their task and can contribute to the overall performance of the company. For example, I used to regularly change work teams, and I usually spend more time talking and understanding them. Therefore, it takes too long to finish the tasks. As a result, I was reprimanded by my superiors.
